Art Unit: 1624

Applicant's amendments and remarks filed 04/30/04 have been received and reviewed.

Claims 17, 19-21, 26-29, 31-36 and 38-42 are now pending in this application.

Note that compounds, corresponding compositions, a method of use and a process of making that are of the same scope are considered to form a single inventive concept under PCT Rule 13.1, 37 CFR 1.475(d). Claims 38-40 are not so linked as to form a single inventive concept. These compositions are so diverse in scope that a prior art anticipating one composition under 35 USC 102 would not render obvious another compound of the same claim under 35 USC 103. These claims also raise different issues of patentability. Applicants need to cancel these claims because they are of a different scope.

Claims 38-40 are withdrawn from consideration.

Claims 17, 19-21, 26-29, 31, 32, 34-36, 41 and 42 are allowed.

Claim Rejections - 35 USC § 112

Claim 33 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicant's arguments have been fully considered but not found persuasive. The basis of this rejection is the same as given in the previous office action and is incorporated herein fully by reference. The assay Applicants point to, while enabling for asthma, does not give any guidance to all of the other diseases recited.

Art Unit: 1624

As the Supreme Court said in *Brenner v. Manson*, 148 USPQ at 696: “a patent is not a hunting license. It is not a reward for the search, but compensation for its successful conclusion.” As U.S. Court of Customs and Patent Appeals stated *In re Diedrich* 138 USPQ at 130, quoting with approval from the decision of the board: “We do not believe that it was the intention of the statutes to require the Patent Office, the courts, or the public to play the sort of guessing game that might be involved if an applicant could satisfy the requirements of the statutes by indicating the usefulness of a claimed compound in terms of possible use so general as to be meaningless and then, after his research or that of his competitors has definitely ascertained an actual use for the compound, adducing evidence intended to show that a particular specific use would have been obvious to men skilled in the particular art to which this use relates.”

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
